

List of Oral Presentations

Tuesday, December 10th

16:00

THEMATIC SESSIONS

NANOPARTICLES & TARGETING

16:00	Targeted polyHPMA-based nanomedicines for cancer and inflammatory treatment	Tomas ETRYCH • <i>Institute of Macromolecular Chemistry CAS, Czech Republic</i>
16:30	A new painkiller nanomedicine to by-pass the blood-brain barrier and the use of morphine	Sinda LEPETRE-MOUELHI • <i>Univ. Paris Sud - IGPS, France</i>
16:45	Nanoparticles to remote-control TRAIL-induced cell death in cancer cells	Olivier MICHEAU • <i>INSERM - LNC, France</i>
17:00	Use of microfluidic technology to prepare nano/micro particles for diagnostic and therapeutic applications	Samir CHERKAOUI • <i>Bracco Suisse, Switzerland</i>
17:15	Perivascular drug delivery system for prevention of vein graft failure	Tamara MELNIK • <i>Institut des Sciences Pharmaceutiques de Suisse Occidentale, Switzerland</i>
17:30	Novel synthetic routes for small and defined gold nanoparticle-nanobody conjugates	Nadja GROYSBECK • <i>Univ. Strasbourg - BSC, France</i>
17:45	Hybrid liposomes for temoporfin delivery to the tumor tissue	Ilya YAKAVETS • <i>Belarusian State Univ. - Biophysics & Biotechnology Lab., Belarus</i>
18:00	Magnetic Molecularly Imprinted Polymer for Cancer Therapy	Nebewia GRIFFETE • <i>Sorbonne Univ. - PHENIX, France</i>
