

List of Poster Presentations

P1 - NANOPARTICLES & TARGETING

P1-01	In vivo targeting PSMA expressing cells in prostate cancer with scFv functionalized nanoparticles	Clément VECCO-GARDA • ENSCR - ICMCB, France
P1-02	Copper based nanoparticles synthesis	Alexandre GUYONNET • Univ. Bordeaux 1 - ICMCB, France
P1-03	Influence of shea butter amount on the properties of calcium-pectin microparticles	Odile CHAMBIN • Univ. of Bourgogne - PAM, France
P1-04	Preparation of omega-3 polyunsaturated fatty acid-rich cholesteryl esters and triglycerides in nanoemulsions for intranasal delivery in AMD	Glenda VASKU • AgroSup Dijon - CSGA, France
P1-05	Intestinal Alkaline Phosphatase Triggered Zeta Potential Changing Nanoparticles across Mucus and Epithelial Barriers	Zeynep AKKUS • Univ. of Innsbruck - CCB, Austria
P1-06	Encapsulating chlorpromazine in cyclodextrin-liposomes for treatment of myeloid malignancies	Edvin GUNDERSEN • Univ. of Bergen - Dpt of Clinical Science, Norway
P1-07	Ultrabright fluorescent dye-loaded polymeric nanoparticles for targeting lipids and proteins	Caterina SEVERI • Univ. of Strasbourg - LBP, France
P1-08	Impact of the inner structure of maltodextrin nanoparticles on the development of a mucosal vaccine	François FASQUELLE • Univ. of Lille - LIRIC, France
P1-09	Effect of the NFL peptide on canine glioblastoma	Audrey GRIVEAU • Univ. of Angers - MINT, France
P1-10	Study of mechanisms allowing nanomedicines to treat inflammatory bowel disease	Norhane SALAH • Univ. of Lille - LIRIC, France
P1-11	Actively targeted HPMA copolymer-based nanoprobe for head and neck cancer imaging	Robert POLA • IMC - CAS, Czech Republic
P1-12	Mucopenetrating liposomes with CD44 targeting ability as a platform for the treatment of fibrotic and cancer lung disease	Alessandro MARENGO • Univ. of Paris Sud - IGPS, France
P1-13	Tailored polysaccharides based nanogels as boron delivery systems for boron neutron cancer therapy	Simon CONINX • CNRS - CERMAV, France
P1-14	Evaluation of cationic and neutral liposomes' uptake by human villous placental explants	Louise FLIEDEL • Univ. Paris Descartes - UTCBS, France
P1-15	Reproducible production of liposomes by an automated microfluidic based apparatus	Kairallah ALHARETH • Univ. Paris Descartes - UTCBS, France
P1-16	The influence of stroma content on the behavior of liposomal-based Temoporfin formulation in 3D tumor spheroids	Ilya YAKAVETS • Belarusian State Univ./ Univ. Lorraine - CRAN & ICL, France
P1-17	Characterization of cationic liposome formulated by microfluidization combined with thin film method	Xiaojing LIU • Univ. Paris Descartes - UTCBS, France
P1-18	Cubic liquid crystalline nanostructures involving catalase and curcumin: A BioSAXS study and bioassays with neuronally derived cells	Miora RAKOTOARISOA • Univ. Paris Sud/ Paris Saclay - IGPS, France
P1-19	Designing A Novel Nanocarrier For combining the delivery of siRNA and Glucocorticoids in The Treatment Of Atopic Dermatitis	Serra GURCAN • Univ. Paris Sud/ Paris Saclay - IGPS, France
P1-20	Cell penetrating peptides to improve magnetic nanoparticles cellular uptake	Mathilde LE JEUNE • Sorbonne Univ. - PHENIX, France
P1-21	Is dynamic light scattering a good method to characterize self-assemblies of cell penetrating peptide-ferrocifen conjugates?	Elise LEPELTIER • Univ. of Angers - MINT, France
P1-22	Antioxidant properties and improved bio-compatibility of cerium oxide nanoparticles with innovative polymer coating	Caroline ROQUES • Univ. of Angers - MINT, France
P1-23	Magnetic particles for magneto-mechanical treatment of glioblastoma cells	Caroline THEBAULT • CEA - SPINTEC, France
P1-24	Synthesis of polyplexes with double hydrophilic block copolymers IPEI-b-POx for gene delivery	Gwendoline DELECOURT • Sorbonne Université - IPCM, France
P1-25	Impact of mucus on gene delivery efficacy by phospholipid carriers in the lung	Thomas SONNTAG • Univ. of Strasbourg - CAMB, France
P1-26	Development of hybrid liposome/poloxamer nano-particles to delay hydrophilic drug delivery by thickening the interior core of liposomes	Shayan AHMED • Univ. Paris Descartes - UTCBS, France
P1-27	New generation of glioblastoma-targeted lipid nanocapsule hydrogel: a sustained and specific drug delivery system	Guillaume BASTIAT • Angers Univ - MINT, France
P1-28	Design of nanocarriers based on biocompatible polymers to encapsulate	Clarisse BROSSARD • CNRS - ISCR, France
P1-29	Biomimetic pulmonary surfactant significantly reduces nanoparticles uptake by alveolar epithelial cells	Milad RADIOM • Univ. Paris Diderot - MSC, France

P2 - NANOSCIENCE FOR CANCER

P2-01	A comparative study of the encapsulation of pentamidine into lipid and polymer nanocarriers	Barbara STELLA • <i>Università di Torino - Dipartimento di Scienza e Tecnologia del Farmaco, Italy</i>
P2-02	Tuning self-assemblies morphologies by variation of the phospholipids polar heads: the case of the vitamin B2 (riboflavin)	Jonathan RIBES • <i>Univ. of Bordeaux - CBMN, France</i>
P2-03	Induction of a strong and persistent antitumor immune response using liposomal vaccines in the HPV-transformed orthotopic lung tumor...	Béatrice HEURTAULT • <i>Univ. of Strasbourg - CAMB, France</i>
P2-04	Preclinical evaluation of a paclitaxel nanoprodruge for glioblastoma therapy	Noé DUMAS • <i>Aix Marseille Univ. - INP, France</i>
P2-05	Low Energy Electron Dissociative Attachment to DNA: an Experimental and Theoretical Study	Norhan OMAR • <i>Univ. of Bourgogne - Chrono-environnement Lab, France</i>
P2-06	Influence of PEGylation on the in vivo behavior of radiosensitizing gold nanoparticles	Inaya DABAJA • <i>Univ. of Bourgogne - UTINAM, France</i>
P2-07	A 3D model of lung cancer for in vitro preclinical prediction of in vivo behavior of nanoMOFs	Vincent PAUTU • <i>Univ. Paris Sud/ Paris Saclay - IGPS, France</i>
P2-08	In vitro and in vivo assessment of magnetic particles for magneto-mechanical glioblastoma treatment	Robert MOREL • <i>CEA - SPINTEC, France</i>
P2-09	Platinum nanoparticles to impair radiation-resistance in breast cancer stem cells: From physical theory to applied biology	Marie HULLO • <i>CEA - LCE, France</i>
P2-10	Design and development of thiolated graphene oxide nanosheets for brain tumor targeting	Ajinkya NIKAM • <i>Dpt of Pharmaceutics, Manipal College of Pharmaceutical Sciences, India</i>
P2-11	Polymeric nanoparticles: microfluidics parameters influencing encapsulation of oncology drug	Mathilde LORSCHIEDER • <i>Ipsen Innovation, France</i>
P2-12	Combination of HSP70 inhibition with Magnetic Hyperthermia promotes synergistic anti-tumoral activity	Véronique GIGOUX • <i>INSERM - RCTC / LPCNO, France</i>
P2-13	Delivery of siRNA to Ewing sarcoma tumor xenografted on mice, using hydrogenated detonation nanodiamonds: treatment efficacy and...	Jean-Rémi BERTRAND • <i>INSERM - VTA, France</i>
P2-14	Dynamic processes induced on cell membrane models by photodynamic therapy	Laure GIBOT • <i>CNRS - IMRCP, France</i>
P2-15	SPION-mediated hyperthermia: which administration route for an efficient minimally invasive, multimodal tumor treatment ?	Olivier JORDAN • <i>Univ. of Genève - ISPSO, Switzerland</i>
P2-16	Turning poorly vascular tumors into highly vascular tumors with nanoparticles: pharmacometric analysis	Raphaëlle FANCIULLINO • <i>AMU - SMARTc, France</i>
P2-17	Co-encapsulation of fisetin and cisplatin into liposomes: optimization of formulation and process and in vitro evaluation	Morgane RENAULT-MAHIEUX • <i>APHP - UTCBS, France</i>
P2-18	Hybrid Conjugates of Gold Nanorods: A Drug-Delivery Vehicle for Targeted Photodynamic Therapy	Zahraa YOUSSEF • <i>CNRS - ICSN, France</i>

P3 - BIO-INSPIRED NANOSYSTEMS

P3-01	Evaluation of mesenchymal stem cells derived small extracellular vesicles as a vector for intracellular protein delivery	Marie MORILLE • <i>Univ. of Montpellier - ICGM</i>
P3-02	Controlled Assembly of Gold Nanoparticles With Quaternized Chitosan for Photothermal Therapy	Florent VOISIN • <i>Univ. of Paris - MSC, Paris</i>
P3-03	Tailoring structural properties of nanoemulsion-loaded chitosan scaffold for sustained intestinal delivery	Annalisa ROSSO • <i>Univ. Claude Bernard of Lyon - LAGEPP, France</i>
P3-04	Comparing detergent micelles and polymer nanodiscs for solubilization and purification of the integral membrane protein Vesicular...	Fredrik Gullaksen JOHANNESSEN • <i>Univ. of Bergen - Dpt of Biomedicine, Norway</i>
P3-05	Nanostructured cantilevers for detection of organophosphorus compounds	Jean-Philippe BRACH • <i>ISL - NS3E, France</i>
P3-06	The use of biocompatible Cyclosporine A loaded nanosystems ameliorates murine experimental colitis	Thomas ANTOINE • <i>Univ. of Bourgogne Franche - Comité - PEPITE, France</i>
P3-07	A study of the properties of the D-Mannose in the natural treatment of urinary infections caused by E- Coli	Sekkal NEZHA • <i>University of Djillali Liabes - LGCE, Algeria</i>

List of Poster Presentations

P4 - NANO FOR IMAGING, DIAGNOSIS AND THERANOSTICS

P4-01	Fluorescent biocompatible nanohydrogels for Gd chelates encapsulation: polymer design, nanogel syntheses and in vitro...	Juliette MOREAU • <i>Univ. Reims Champagne-Ardenne - ICMR</i>
P4-02	Evaluation of polyrotaxanes as novel contrast agents designed against arthritis by engineering of dynamic MRI	Sarah BOUMATI • <i>Univ. of Paris - UTCBS, France</i>
P4-03	Cellular uptake of perfluorocarbon nanodroplets: a potential nanocarrier for ultrasound-mediated drug deliver	Marie-Anne ESTEVE • <i>Aix Marseille Univ - INP, France</i>
P4-04	Influence of PEGylation on the in vivo behavior of radiosensitizing gold nanoparticles	Inaya DABAJA • <i>Univ. of Bourgogne - UTINAM, France</i>
P4-05	Antibody conjugates with fluorescently labeled HPMA polymers for cell analysis	Julia KUDLACOVA • <i>IMC - CAS, Czech Republic</i>
P4-06	Controlling Size and Fluorescence of Dye-Loaded Polymer Nanoparticles through Polymer Design	Andreas REISCH • <i>Univ. of Strasbourg - LBP, France</i>
P4-07	Subcellular-resolved mouse organ distribution of fluorescent nanodiamonds covalently functionalized with a cationic...	François TREUSSART • <i>ENS Paris Saclay - LAC, France</i>
P4-08	Femtomolar detection of nucleic acid based on functionalized gold nanoparticles	Marc LAMY DE LA CHAPELLE • <i>Univ. of Le Mans - IMMM, France</i>
P4-09	Novel manganese complexes based on a cyclen derivative: synthesis and relaxometric characterization	Marie DEVREUX • <i>Univ. of Mons - Dpt of general, organic and biomedical chemistry</i>
P4-10	Old story, new results: properties of fluorescent labels and visualization of PLGA nanoparticles	Vasilisa ZHUKOVA • <i>Univ. of Strasbourg - Neurosciences, France</i>
P4-11	Iron oxide nanoparticle-based MRI-PET double imaging contrast agents	Julien BOUDON • <i>Univ. of Bourgogne Franche-Comté - ICB, France</i>
P4-12	Zwitterionic Stealth Dye-loaded Polymer Nanoparticles for Intracellular Imaging	Anne RUNSER • <i>Univ. of Strasbourg - LBP, France</i>
P4-13	Shortwave infrared emitting QD-gold nano-assemblies for in vivo pH imaging	Thomas PONS • <i>INSERM - LPEM, France</i>
P4-14	Theranostic ultra-small gold nanoparticles for integrated PET/MR imaging	Alix DESHOTEL • <i>Univ. of Bourgogne Franche-Comté - UTINAM, France</i>

P5 - NANO-OBJECTS IN BIOLOGICAL FLUIDS

P5-01	Exploring the sensitivity of NanoBioAnalytical platform for analysis of biological extracellular vesicles: How far we can push?	Céline ELIE-CAILLE • <i>Univ. Franche Comte - FEMTO-ST, France</i>
P5-02	Deciphering the structure of multimers and nanostructures of α -synuclein using coarse grained molecular dynamics	Adrien GUZZO • <i>Univ. Bourgogne Franche-Comté - ICB, France</i>
P5-03	Towards a novel biocompatible probe allowing for real-time temperature measurements at cellular scale	Lise ABIVEN • <i>Sorbonne Univ. LCMCP, France</i>
P5-04	Antigen Presenting Cells (APCs) functions after exposure to nanoparticles	Arindam DEY • <i>Univ. of Grenoble- Alpes - IAB, France</i>

P6 - NANOCHEMISTRY : SYNTHESIS AND FUNCTIONALIZATION OF NANOSYSTEMS FOR BIOAPPLICATIONS

P6-01	Characterization of OSA modified pectin solutions at a nanoscale level	Odile CHAMBIN • <i>Univ. of Bourgogne - PAM, France</i>
P6-02	Surface modification of carbon quantum dots: fine tuning of antibacterial activity	Elizaveta SVIRIDOVA • <i>National Research Tomsk Polytechnic University - RSCABS, Russia</i>
P6-03	Development of pullulan-based cationic nanoparticles for the delivery of miRNA	Fernanda MORAES • <i>Univ. of Paris - LVTS, France</i>
P6-04	Synthesis by polyol and characterization of iron oxide nanoparticles soluble in water	Sendos DARWISH • <i>Univ. of Paris - ITODYS, France</i>

P6-05	Engineering of magnetic silica nanoplatfoms for the remote delivery of therapeutics under alternating magnetic field	Alexandre ADAM • <i>Univ. of Strasbourg - IPCMS, France</i>
P6-06	Protein-based nanoparticles as protein carrier: Synthesis, characterization, and antibacterial application	Mohamad TARHINI • <i>Univ. Claude Bernard of Lyon - LAGEPP, France</i>
P6-07	Magnetic Cationic Liposomes for Nucleic Acid Delivery	Do Hai DOAN • <i>Univ. of Paris - UTCBS, France</i>
P6-08	Influence of PEGylation on the in vivo behavior of radiosensitizing gold nanoparticles	Inaya DABAJA • <i>Univ. of Bourgogne - UTINAM, France</i>
P6-09	Self-assemblies of azacitidine prodrug: an innovative therapy against myelodysplastic syndromes	Milad BAROUD • <i>Univ. of Angers - MINT, France</i>
P6-10	Superferrimagnetic curcumin derivated nanodispersion for magnetic fluid hyperthermia	Marina COUPEAU • <i>Univ. of Nantes - CEISAM, France</i>
P6-11	Thermoresponsive, biodegradable polymer nanoparticles for hyperthermia-triggered drug delivery	Justine JAKPOU • <i>Univ. of Paris Sud - IGPS, France</i>
P6-12	Continuous flow synthesis of iron oxide nanoparticles : experimental parameters influencing the size and magnetocrystalline properties	Thomas VANGIJZEGEM • <i>Univ. Of Mons - Dpt of general, organic & biomedical chem., NMR and molecular, Belgium</i>
P6-13	Assembly of Lipid-Core/Polymer Shell Hybrid Nanoparticles Assessed by Fluorescence Labeling	Sophie BOU • <i>Univ. of Strasbourg - LBP, France</i>
P6-14	Functionalized silica stellate nanoparticles for iron capture as an option of diseases treatment	Paula RAMIREZ DUENAS • <i>ECPM - IPCMS, France</i>
P6-15	Silica Nanoplatfoms as Bimodal Contrast Agents for 1H MRI and Optical Imaging	Indiana TERNAD • <i>Univ. Of Mons - Dpt of general, organic & biomedical chem., NMR and molecular, Belgium</i>
P6-16	Influence of the Aptamer Grafting on its Conformation and its Interaction with Targeted Protein	Marc LAMY DE LA CHAPELLE • <i>Univ. of Le Mans - IMMM, France</i>
P6-17	Physico-chemical characterisation of Hybrid Poly Ion complexes: towards a versatile platform for imaging applications	Jean-Daniel MARTY • <i>Univ. Toulouse Paul Sabatier - IMRCP, France</i>
P6-18	Multifunctional gold nanoparticles for cancer imaging and therapy	Agathe BRUDO • <i>Sorbonne Univ. - LBM, France</i>
P6-19	Docetaxel Gold Complex Nanoflowers: Chemo-Biological Evaluation for better Therapeutic Efficiency	Maroua BEN HADDADA • <i>Torskal, France</i>
P6-20	Endemic Plants: From Design to a New Way of Smart Hybrid Nanomaterials for Green Nanomedicine Applications	Maroua BEN HADDADA • <i>Torskal, France</i>
P6-20 bis	Proof of concept of plasmonic thermal destruction of surface cancers by gold nanoparticles obtained by green chemistry	Anne-Laure MOREL • <i>Torskal, France</i>
P6-21	Combined Phototherapy and NIR Light Induced Drug Delivery to Cancer Cells Achieved by Protein Capped Carbon Nanotubes-Mesoporous	Bing LI • <i>Univ. of Strasbourg - ICPEES, France</i>
P6-22	Plasmonic catalysis for Suzuki-Miyaura cross coupling reaction using palladium nanoflowers	Ibrahim ABDELLAH • <i>Univ. Paris Sud - LCP, France</i>
P6-23	Preliminary evaluations of PSMA-targeted NIR upconverting nanoparticles for dual scintigraphic/fluorescence-guided surgery...	Axel CORDONNIER • <i>Univ. of Clermont-Ferrand - ICCF, France</i>
P6-24	Functionalized anisotropic gold nanoparticles for Surface Enhanced Raman Spectroscopy and bio-applications	Thomas LE NEEL • <i>Univ. of Nantes - IMN, France</i>
P6-25	Polynuclear Gd-chelates for targeted MRI-imaging: influence of internal structure on relaxivity performance	Volodymyr MALYTSKYI • <i>Univ. of Reims Champagne Ardenne - ICMR, France</i>
P6-26	Energy transfer-based DNA sensing using upconversion nanoparticles	Laura FRANCES SORIANO • <i>CNRS - I2BC, France</i>
P6-27	Synthesis and Characterization of Cu doped ZnO Nanoparticles	Ariunzaya TSOGOO • <i>Univ. of Le Mans - IMMM, France</i>
P6-28	Bola-amphiphilic dendrimers as modular nanovectors for nucleic acid delivery	Jiaxuan CHEN • <i>Aix Marseille Univ. - CINaM, France</i>
P6-29	Spectroscopic Characterization of Grafting and Aptamer Interactions on a Target Protein (SOD)	Rawdha DEKHILI • <i>Univ. Paris Nord - CSPBAT, France</i>
P6-30	Predictive tools for designing biocompatible nanoparticles and nanostructured materials	Jordan BEURTON • <i>Univ. of Lorraine - CITHEFOR, France</i>
P6-31	Metallic Bismuth Nanoparticles Synthesis via a Greener Process	Catherine GOMEZ • <i>CNAM - GBCM, France</i>
P6-32	Preparation and characterization of imatinib loaded ethylcellulose microspheres	Singh PADYA BHARATH • <i>Dpt of Pharmaceutics - Manipal College of Pharmaceutical Sciences, India</i>

List of Poster Presentations

P7 - NANOMATERIALS

P7-01	Sample preparation steps to measure the size of constituent particles by SEM	Carine CHIVAS • LNE, France
P7-02	Dimensional measurement of TiO ₂ particles in powder form by SAXS and SEM	Najoua BOUZAKHER GHOMRASNI • LNE, France
P7-03	Synthesis, self-assembly and thermal stability of silver monodisperse nanocubes for microelectronic applications	Maxime BRONCHY • Univ. of Bordeaux - ICMCB, France
P7-04	Magnetic Nanohybrids for Active Pharmaceutical Ingredients Manufacturing	Jérémy PARIS • Synthesis of Nanohybrids, France
P7-05	MOX gas sensors obtained by mixing p-type and n-type nanostructured metal oxides for air quality sensors	Pierre FAU • Univ. Toulouse Paul Sabatier - LCC, France
P7-06	Identifying Patterns in Time Series Data: Application to Biological Peptide Translocation through single-layer MoS ₂ Nanopores	Adrien NICOLAÏ • Univ. Bourgogne Franche-Comté - ICB, France
P7-07	Imogolite nanotubes partially transformed by decylphosphonic acid to form an interface active composite material	Fabienne TESTARD • CEA - NIMBE, France
P7-08	Microstructure impact on high temperature corrosion behavior of AISI 316L stainless steel additively manufactured by AM-SLM	Corentin SIRI • Univ. Bourgogne Franche-Comté - ICB, France
P7-09	Synthesis of a fluorinated nanoporous SAPO-34 application to the adsorption of CO ₂	Salima BELLATRECHE • University of Oran, Dpt of Pharmacy, Algeria
P7-10	Design and characterization of tio ₂ -bivo ₄ heterostructures for visible light driven photocatalysis	Drisyia KARATHUPARATHOTTATHIL • Univ. of Le Mans - IMMM, France
P7-11	Graphene oxide quantum dots synthesized from biomass wastes: white light emitting material in the solid state	Jean-Jacques GAUMET • Univ. of Lorraine - LCPA2MC, France
P7-12	Microwave-assisted functionalization and post-synthesis modification of an Aurivillius phase : an easy approach to new functional layered...	Guillaume ROGEZ • CNRS - IPCMS, France
P7-13	Core@shell nanoparticles: synthesis, properties and catalytic performances	Denis UZIO • IFPEN, France
P7-14	Elaboration, structural and optical properties of SiO ₂ :B/SiO ₂ multilayers	Fatme TRAD • Univ. Lorraine - IJL, France
P7-15	Lipid nanocapsules for the sustained release of therapeutic miRNA: new perspective in regenerative medicine of intervertebral disc	Brian LE MOAL • Univ. of Nantes - MINT, France
P7-16	Extra Low Density and High Porosity Conductive Silver Nanowires Aerogels	Maribel TOURON • CEA - LITEN, France
P7-17	Gold nanoclusters synthesis and functionalization aiming at properties enhancement	Victoire ASILA • Sorbonne Univ. - LCMCP, France
P7-18	Continuous hydrothermal synthesis of doped barium zirconate powder for PCFC application	Mélanie FRANÇOIS • Univ. of Bourgogne Franche-Comté - ICB, France
P7-19	Evaluation of solid lipid nanocarriers to increase peptide oral bioavailability	Camille DUMONT • Univ. Claude Bernard Lyon 1 - LAGEPP, France
P7-20	Synthesis of patchy nanoparticles for self-assembled diamond-like structure	Rawan KHALAF • Univ. of Bordeaux - CRPP, France
P7-21	Mechanical-assisted liquid exfoliation of functionalized transition metal oxide	Frédéric PAYET • Univ. of Strasbourg - IPCMS, France
P7-22	Flexoelectric coefficient of single carbon nanotubes	Raya EL BEAINOU • Univ. Bourgogne Franche-Comté - FEMTO-ST, France
P7-23	Effect of laser sintering on Al-doped ZnO thin films prepared by ink-jet printing	Olga SHAVDINA • Univ. of Orléans - GREMI, France
P7-24	Conducting polymer nanostructures for photocatalytic applications	Xiaojiao YUAN • Univ. Paris-Sud - LCP, France
P7-25	Ni-Al ₂ O ₃ nano-composites thin films obtained by EPD for solar energy application	Souaad HAMOUDI • Université A Mira de Béjaia, Algeria
P7-26	Nanostructured plastic scintillators for enhanced radiation detection	Djadidi TOYBOU • CEA - LIST, France
P7-27	Elaboration of silica coated gold nanorods (AuNR@SiO ₂) towards versatile nanoplatforms for biomedical applications	Vincent PELLAS • Sorbonne Univ. - LRS, France
P7-28	Supramolecular Nanohybrid architectures for Optimized UpConversion through controlled enERgy migration	Lohona Kevin SORO • CNRS - IPHC - SYNPA, France
P7-29	Synthesis of Inverse patchy nanoparticles	Sharvina SHANMUGATHASAN • CNRS - CRPP, France

P8 - NANOPHOTONICS AND NANO-OPTICS

P8-01	Fluorescence properties of self-assembled colloidal supraparticles from CdSe/CdS/CdZnS/ZnS nanocrystals at 4K	Victor BLONDOT • UVSQ - GEMaC, France
P8-02	Proposal for a spiking nanolaser	Maxime DELMULLE • Paris Sud/ Paris Saclay Univ. - C2N/ Thales, France
P8-03	Synthesis and fluorescent properties of self assembled colloidal superparticles from CdSe/CdS/ZnS nanocrystals and their...	Alexandra BOGICEVIC • ESPCI - LPEM, France
P8-04	Electrical control of the nonlinear photoluminescence of metal nanostructures	Adrian AGREDA • Univ. of Bourgogne - ICB, France
P8-05	Nanofabrication and optical characterisation of modal plasmonic cavities	Florian DELL'OVA • Univ. of Bourgogne - ICB, France
P8-06	Plasmon mediated single photon source coupling to photonic waveguide	Xiao YU • Univ. of Bourgogne - ICB, France
P8-07	Bio-detection With Whispering Quantum dots	Jana SUBHA • ESPCI Paris - LPEM, France
P8-08	Study of the photon statistics emitted by optically pumped gold nanoparticles	Konstantin MALCHOW • Univ. of Bourgogne - ICB, France
P8-09	SERS signal optimisation of gold nanocylinder on gold film	Marc LAMY DE LA CHAPELLE • Univ. of Le Mans - IMMM, France
P8-10	Plasmonic properties of gold nanocylinder on gold film	Marc LAMY DE LA CHAPELLE • Univ. of Le Mans - IMMM, France
P8-11	Size Effect on Photothermal Heat Elevation of Gold Nanoparticles: Absorption Coefficient Experimental Measurement of Gold...	Nadia DJAKER • Univ. of Paris Nord - CSPBAT, France
P8-12	Plasmon mediated interactions between fluorescent emitters: from weak to strong coupling regime	Camilo PEREZ • ESPCI Paris - Langevin Institute, France

P9 - SURFACE, INTERFACE AND NANOCONFINEMENT

P9-01	Electrical Characterization of Nanostructures by Atomic Force Microscopy Modes: Comparison and example of application	Oleksandr SYNHAIVSKYI • EC of Lyon - INL, France
P9-02	Improved model of ionic conductivity in 2-D MoS2 nanoporous membranes	Maria-Daniela BARRIOS PEREZ • Univ. of Bourgogne - ICB, France
P9-03	Investigating effects of chain length and terminal group on the organization of thiolate Self-Assembled Monolayers (SAMs)...	Yacine MAZOUZI • Sorbonne Univ. - LRS, France
P9-04	Presentation of ICB laboratory technological platform	Michaele HERBST • Univ. of Bourgogne - ICB, France
P9-05	Role of low water dielectric constant on ionic transport in nanopores	Théo HENNEQUIN • Univ. Toulouse Paul Sabatier - LPT, France
P9-06	Silver butyl amidinate complex: an original precursor to nanostructure a carbon based electrode	Katia FAJERWERG • Univ. Toulouse Paul Sabatier - LCC, France
P9-07	Role of protein corona on nanoparticles: influence of the surface chemistry	Célia MARETS • CNRS - ICB, France
P9-08	Advanced simulations for the study of biological processes on the nanointerfaces of immunosensors	Didac MARTI • Universitat Politècnica de Catalunya, Spain
P9-09	Control of surface nanoporosity in films of polythiophene derivatives	Juan TORRAS • Universitat Politècnica de Catalunya, Spain
